**CA-3
1558****198-12-013 - Order Instituting Investigation into the power outage which occurred on December 8, 1998 on Pacific Gas and Electric System.**

This investigation addresses the Pacific Gas and Electric Company (PG&E) power outage that occurred on December 8, 1998 in San Francisco. The intent of the investigation was to discover the root causes of the outage and to identify and implement measures to prevent future outages. The Commission has developed a substantial record through the submission of reports by the parties, and extensive workshops. These have culminated in a joint report by PG&E, the Commission's Consumer Protection and Safety Division, and the City and County of San Francisco. The joint report recommends a series of reporting requirements designed to monitor outages, and PG&E's progress toward implementing various measures designed to enhance system reliability. In this opinion, the Commission adopts the recommended reporting requirements. This proceeding is closed.

1724****A02-07-009 - Southwest Gas Corporation.**

For authority to adjust public purpose program surcharges. A02-07-013, A02-07-016, A02-07-017, A02-07-018, A02-11-024, A02-11-050 - Related matters. This decision addresses the low-income assistance programs of Alpine Natural Gas Company, Avista Utilities, Bear Valley Electric Company, Southwest Gas Company, Sierra Pacific Power Company, PacifiCorp and West Coast Gas Company. The Commission establishes funding levels and penetration rate benchmarks for their California Alternate Rates for energy programs during program year (PY) 2003 and PY2004. The Commission also authorizes funding for their Low-Income Energy Efficiency programs during PY2003, and requires them to file applications for PY2004 by July 1, 2003. The Commission addresses other issues, such as reporting and ratemaking treatment, raised by Energy Division in its Workshop Report. Southwest Gas Company and Sierra Pacific Company are authorized to increase ratepayer collections to fund their PY2003 programs. The associated rate changes will be implemented in their pending general rate case proceedings. These proceedings are closed.

1372****R93-04-003 - Rulemaking on the Commission's own motion to govern open access to bottleneck services and establish a framework for network architecture development of dominant carrier networks.**

I93-04-002 - Related matters. This decision adopts interim monthly prices for a subset of network elements that Verizon California, Inc. (Verizon) sells to competitive local exchange carriers (CLCs). Specifically, this decision adopts the proposal presented by AT&T Communications of California, Inc., WorldCom Inc., and The Utility Reform Network (TURN) to base interim prices on Unbundled Network Element (UNE) rates recently adopted for Verizon in New Jersey. The New Jersey rates are adjusted based on the Federal Communications Commission's (FCC's) Synthesis Model and deaveraged into two zones for loops. For unbundled loops, the 2-wire interim loop rate is \$10.56 in Zone 1 and \$22.37 in Zone 2. For unbundled switching, the Commission adopts interim end office and tandem switching rates that are 60% and 31% less than current rates, respectively. The Commission adopts a basic port rate of \$2.12 that is 54% less than the current rate. The markup for shared and common costs embedded in current UNE rates shall remain at 22% as adopted in D97-01-022. This proceeding will remain open to set final UNE rates for Verizon. The interim UNE rates adopted in this order are subject to adjustment, either up or down, from the effective date of this order until final rates are adopted. This decision modifies the interim price floor formula adopted for Verizon in D99-12-018. When calculating price floors, Verizon should use the interim UNE rates adopted in this order and incorporate other changes to reflect the lower UNE rates adopted today. Finally, today's order applies a 22% markup for shared and common costs to Verizon's nonrecurring costs and orders Verizon to make several changes in how it has combined these costs to form the nonrecurring prices competitors will pay.

R99-10-025 - Order Instituting Rulemaking into Distributed Generation.

This decision completes the Commission's rulemaking and establishes policies for ownership and operation of distributed generation and their integration into utility planning and operation of the distribution grid. This decision finds that there is no need to place restrictions on ownership of distributed generation units. The technology of electricity distribution, however, necessitates that a distributed generation owner will only be eligible for compensation for deferring distribution system upgrades in limited circumstances, described herein, and only if the distributed generator offers physical assurance. Similarly, since almost every retail sale will utilize both the distribution and transmission networks (even those that appear to stay within a single circuit), the Commission does not adopt a distribution-only tariff.

1650****I00-11-001 - Order Instituting Investigation Into Implementation of Assembly Bill 970 Regarding the Identification of Electric Transmission and Distribution Constraints, Actions to Resolve Those Constraints, and Related Matters Affecting the Reliability of Electric Supply.**

This decision concludes that the construction of the Miguel-Mission and Imperial Valley Projects will be economic to San Diego Gas & Electric Company's (SDG&E) ratepayers if a threshold amount of new generation develops in the California-Mexico border region and if project costs do not exceed the preliminary estimates presented in this proceeding. The Commission conditions its finding of economic need in two ways. First, it requires SDG&E to coordinate construction of the transmission upgrades with the construction of a threshold level of new generation in the border area. This will be accomplished through a schedule of milestone conditions discussed in this decision. Second, it caps project costs based on the estimates presented in this proceeding, subject to reasonableness review. With regard to licensing, the Commission finds that the Imperial Valley Project does not require the issuance of a Permit to Construct or a Certificate of Public Convenience and Necessity (CPCN) under the requirements of General Order 131-D. However, it directs SDG&E to file an informational advice letter on this project that documents the characteristics of this project that qualify it for exemption from General Order 131-D. The Commission concludes that the CPCN process does apply to the Miguel-Mission Project because this project would increase the existing 138/69 kV transmission line to 230 kV capacity. However, the Commission expedites the licensing process by permitting SDG&E to file its CPCN application under Section IX of General Order 131-D absent the information required by subparts (c), (d) and (f). The milestone conditions set forth the schedule for SDG&E's filings for these projects.
